

# LIQUID HELIUM

Helium is an indispensable noble gas for many of today's and future technologies. Helium is used in liquid phase in many sectors such as MRI cooling (MR and NMR), nuclear magnetic resonance, and superconductivity studies, especially in the medical sector.

As Koyuncu Gas we provide liquid helium service with min. %99,999 (5.0 Grade) purity.

“ We fill all brands of MR and NMR devices in the company of our expert MRI technicians. ”
